**Languages:** Python, Java, JavaScript, C++

**Databases:** MySQL, MongoDB

**Middleware:** Flask, Django, Jinja, Express, Mongoose, Node.js, Next.js

**Libraries:** Bootstrap, React-Bootstrap, Materialize, Tailwind

## Technical Projects

**HarvestThyme** || <https://github.com/Rybeitler/HarvestThyme>

A Full-stack React project using express, mongoDB and Node.js built to sell products for a local farm.

- Persistent user login with multiple access levels
- Protected routes refresh and access tokens thru JWT cookies
- Ability to add and remove new products and services on the fly, with photo upload to Cloudinary
- Users can create orders, place and cancel orders, as well as view their orders.
- Employees can view all orders and advance state in database
- REST api to communicate data to MongoDB

**TaskScheduler** || <https://github.com/Rybeitler/TaskScheduler>

A React group project built to allow managers to organize and schedule their workers.

- Built in a group with 4 others, using git branches to create and merge pull requests.
- Login and registration with multiple user types, with different levels of access
- Management accounts can create, edit and delete tasks, as well as assign them to individual workers
- Employee level accounts can view their tasks, organized by date, and add notes as well as mark completed

## Work History

### Charter Communications Spectrum 2017-2021

Field Technician

- Demonstrated navigational and directional skills and met scheduled time commitments in varied locations.
- Conducted troubleshooting of complex software and hardware issues and utilized internal and external resources.
- Diagnosed and resolved home and small office networking issues.
- Installed, maintained, and diagnosed issues with both infrastructure and customer cable lines located indoors and outdoors.
- Assisted with the maintenance of the overall health of the network infrastructure by identifying and resolving issues on street lines and telephones poles.
- Educated customers on the use of Charter equipment, services, and proper maintenance of equipment.
- Completed installations and performed troubleshooting on home security systems, cameras, and sensors.
- Supervised the training of new hires, transfers, and employees that needed additional support.
- Utilized an internal ticketing system to schedule, prioritize, and perform required tasks.
- Worked independently with minimal supervision and met all expectations for performance

### Peoples Choice Credit Union 2016-2017

Teller

- Provided meaningful and efficient interactions with customers.
- Processed and organized incoming correspondence.
- Completed various financial transactions in internal banking systems.
- Managed cashflow and completed accurate accounting.

## Education

### Coding Dojo - Full Stack Bootcamp 2022-2023

- 8 Month program for building full stack applications.
- Python with flask/django, Java with Spring + Spring IDE, React with MongoDB.
- Earned a Black Belt in all 3 courses.
- Capstone solo and group projects .
- Earned Full Stack Web Developer Certification.

### Central Connecticut State University 2013-2016

- Majored in Engineering with a minor in Mathematics.
- Deans List multiple semesters
